Displaying information 12 x 15 multicolored point matrix, 3 x .56 high LEDs, 2 x .80 high LED display shows feedback on time, speed, distance, inclination, calories, aerobic points, pulse, heart rate, average speed and pace. Available Buttons Incline and - Speed and -, Start, Pause, Stop, Timer and -, Warm Cool Down, Express Keys, Express Tilt, Express Speed, Intensity Program, Fat Burn, Cardio, Personal Trainer, Virtual Reality, Left Data Select, Right Data pick. When the red lights are active, you have to insert age, weight, maximum inclination, top speed, warm up and cool down. There are 4 available custom computers. To install the user ID, stand on the running strap and attach the clothing clip to the end of the magnetic security key to your clothes. Select the user ID, tilt, remove and re-admire the magnetic security key and tap the user ID until the desired number is displayed. You can remember the cumulative/individual summary of your last seven workouts, as well as customize user information. Information on heart rate Two options are available wireless transmitter chest strap and heart rate contacts. The program has 3 program options you can choose from: Fast Start, Guide and Calorie Trainer. There are 9 intensity levels for each of these 6 Personal Trainer workouts: Thigh Shaper, Glute Toner, Waist Reducer, Hill Intervals, Speed Intervals and Mixed Intervals. 5 heart rate workouts available: Heart Rate Monitor, Target HRC, BODY Fat Burning Area, Cardio Area and HRC Interval. In addition, you have 6 courses of virtual reality: Lombard Street, Steeple Chase, Appalachian Trail, Climb to the Top, Coastal Trail and Tahoe Rome. Fitness Scores are also included. HRC programs act as your personal trainer. You set your target and the treadmill takes care of the rest. In addition, 3 custom workouts are ready for use. Integrated reading rack included After the subject of this treadmill in court, we decided it's official: you spend a serious \$2,700, but it's definitely worth it. PaceMaster Platinum Pro VR is one of their dedicated releases. It has an impressive range of features, attractive programs, generous options and an easy-to-use guide that lacks importance. We recommend this treadmill and here's why. If you are looking into buying this treadmill, you should be an enthusiastic runner. Platinum VR comes with a plethora of features that have been a real boost to our daily launches. Starting with the engine, it is large, durable and powerful as well, able to maintain -3 reduction. We didn't experience any inconvenience, but it is true that it is not backed up by a lifetime warranty, unlike other competitive Turning to the belt, of course, it is large and long, enough for users with heights and weights above average to have a comfortable performance on the running belt. And we're talking about serious running here, something that can simulate

running in the fresh air at any time. Platinum VR packed with 3 reduction reductions 0 to -3, which is a real buzz for users who enjoy hill intervals. It's pretty your knees, so make sure you use the lowering feature before you decide to purchase. This treadmill is not only ideal for the descent of avid runners, but also who have a hard time with monotony. This is the story on Platinum VR, thanks to a series of stimulating workouts that are not only effective but also fun. We're basically talking about 6 distance courses based on known routes, such as the Tahoe Rome or Appalachian Trails. If you're a mountain type, you'll get a real kick out of this feature. Users with weight problems will be guided through the programming process and will have plenty of programs to choose from, so diversity is included that is almost crucial in weight loss. Up to 4 people can use this treadmill at the same interval. 4 custom ID lets you insert your own values, save your workout, and then, check your resume for collective or individual workout information. This is a great function for monitoring performance over time, so you know where you go wrong and right. The warranty though is good, but not great, and it is because of the engine, which is unfortunately not insured for life. The main attraction of the main attraction, of course, is a wide and varied range of trainings. This treadmill is built for efficiency, and the quality of the components is proof this device was designed to last. Of course, it's not all milk and honey. Some users say that the frame is somewhat wobbly. We don't experience it by now, but it can also happen. Also, if you're nostalgic for the touchscreen, you can forget it. They're not on the platinum block. In addition, music or video is also a story. But we believe that The reliability and reputation of PaceMaster compensate for the lack of entertainment. To sum up, PaceMaster Platinum Pro VR is a treadmill that we strongly recommend. However, if you won't use the reduction feature, we say that you should consider PaceMaster Silver, which is \$400 less and has the same programming set but less workouts. 2,700 euros is the price listed on the official website in November 2012, and it does not include taxes on delivery, delivery and sale. Page 2Page 3 PaceMaster Platinum Pro VR takes your indoor exercises to a whole new level, as it's the only treadmill that really repeats the fun and fun of outdoor or running. It has the largest number of possible program options in the industry to date, including virtual reality courses. This treadmill also has 9 levels of intensity for each of these programs: Thigh Shaper, Glute Toner, Reducer, Hill Intervals, Speed Intervals and Mixed Intervals. The PaceMaster Platinum Pro VR treadmill is the ultimate in comfort. Its constant mode of compensating efforts, slows uphill and accelerates for descents, so you maintain the same tension throughout. Adding an orthopedic shock tread in conjunction with our Triflex Triflex Shock Management makes you feel like you are walking through the air. Features - Drive Motor: 3 hp Continuous Duty McMillan Engine @3800rpm (St. Paul, MN) - Automaker: McMillan Motors - Engine Management: Dual Microprocessor Digital Control System - Lifting Motor: 1000 pounds. They even put some fun into hilly VR courses as you will explore fitness runs such as Lombard Street, Steeple Chase, Appalachian Trail, Summit Climbing, Coastal Way, and Tahoe Ring. The Pacemaster Platinum Pro VR treadmill machine has a 12 x 15 multicolored dot matrix display plus 5 large LEDs that show time, speed, distance, inclination, calories, tempo, average speed, heart rate area, and aerobic points. One of the key features is the negative slope (the deck can be ed to -3 angle) to simulate walking or running down. Among its regular programs - including High Shaper, Glute Toner, Waist Reducer, Hill Intervals, Speed Intervals, Mixed Intervals - each can be adjusted from up to 9 levels of intensity. There are also 5 heart rate and 3 custom programs. Specifications on Pacemaster Platinum Pro VR include: 3 HP Continuous Duty Motor 0.5-12 mph -3% to 12% Incline 20 x 60 strap 20 programs and variations of 6 Virtual Reality Contact Heart Rhythm Monitoring Program Tri-Flex Shock Shock Management System 400 pounds. max. User weight guarantee: frame life, 12 years engine, 5 year parts, 1 year of work Buzz UPDATE: Pacemaster out of business and their treadmills are no longer available for sale. Check out Precor and Life Fitness for comparable treadmills. From a mechanical point of view, experts looking under the hood note the quality that went into production of Pacemaster Platinum Pro VR. They give high marks to the big 3 CPH running Engine, 1,000-pound lift thrust engine, 2.5 precision rollers (with constantly smeared airtight bearings), 1 thick stretch steady belt (rated for 10,000 miles), and maintenance-free phenolic deck surface. The reduction function makes Pacemaster Pacemaster Pro VR is a unique find, and treadmill reviews are enthusiastic about the overall packaging and design of this machine. It appreciates almost all areas, including noise, depreciation, power, ease of use, software, warranty, and dollar value. At 205 pounds, it's an easier machine than competitors, but it can still handle a heavier person without any shake or wobble. Note: If you want this Pacemaster package but don't want to pay extra for two key features, negative tilt and virtual reality courses, save \$200 and get Gold Elite VR. What we say with most of the programs/variations of any treadmill in the industry, The Pacemaster Platinum Pro VR carries a solid reputation for reliability and craftsmanship. Unsurprisingly, this model, along with Gold Elite VR, are number 1 and 2 on the best Buy lists in the \$2000-\$2500 price range. For \$2,499, you'll get years of comfort, performance and reliability, and you'll be looking forward to doing your morning jogs on this great machine. The Pacemaster Platinum Pro VR treadmill is highly recommended. Show me other Pacemaster treadmills pacemaster platinum pro vr treadmill for sale
